MEDIA RELEASE

Baar, Switzerland, July 9, 2026

medmix strengthens its innovation portfolio with the launch of FleXa™

medmix introduces FleXa™, a new customizable syringe platform that advances precision and branding for single-component dental materials. This modular system combines usability with flexible design options to help manufacturers differentiate in a competitive market.

FleXa™ offers manufacturers over 150 medical-grade colors, custom color matching, and design options such as custom shapes or foil printing. Interchangeable accessories across all sizes enable seamless branding while simplifying product line management.

Patent-pending key features include the drip-reducing plunger design to minimize material waste, the 360° rotatable Grip Plate for advanced ergonomics and control for the user, and the silicone oil-free system that supports manufacturer's assembly workflows and material stability.

"Innovation at medmix means anticipating where our customers need to go next," said René Willi, CEO at medmix. "With FleXa™, we are bringing together engineering, usability, and design in a platform that helps dental manufacturers differentiate and build for long-term growth. Developed in close collaboration with our partners, it empowers them to create customized products while simplifying their supply chain."

FleXa™ comes in four volumes, 0.75 mL, 1 mL, 2 mL, and 3 mL, with shared outer dimensions and compatible accessories, reducing complexity and cost across a manufacturer's product portfolio. Complete compatibility with 60+ medmix Dispensing Tips provides flexibility for a wide range of applications. Options for preassembled, unassembled, or fully unassembled components provide flexibility for diverse production setups.

With FleXa™, medmix strengthens its position as an innovation partner, translating customer insight and engineering expertise into flexible delivery systems designed to meet the evolving needs of the dental industry.
