ONE-SIZE
FITS-ALL*

The **ZerofloX** micro applicator is designed for *efficient & flock-free* application of:

- adhesives
- cements
- composite
- variety of other dental materials

Color	● mint
Size	Universal **
Types of dental material	Bonding agents Primers & conditioners Etchants Fluorides Desensitizers Cavity liners Composite-based resins Cements Sealants
Order No.	184090 (Bag of 50 pcs.) 184091 (Bag of 100 pcs.)

* Universal head size with a soft, pliable and thin anterior head design effectively combines the fine and regular diameter sizes used for conventional micro applicators into one size to help simplify clinical procedures and reduce inventory.
** Comparable to the average range of sizes used for regular, fine and super fine micro applicators.

Save yourself from compromising on quality, comfort and efficiency. ZerofloX™ is your chance to leave second best behind.

What dentists are saying

"With its fiber-free monobloc elastomer bristles, the ZerofloX micro applicator has the potential to become the future gold standard in adhesive esthetic dentistry."

Prof. Dr. med. dent. Ivo Krejci
Switzerland

"The ZerofloX micro applicator offers significant advantages compared to conventional flocked-type applicators due to its ergonomic brush head design, which allows for easy access and application onto just about every type of tooth surface/cavity without the loss of hairlike fiber flocking."

Prof. Fabio M. Salomão DDS, MsC, PhD
Universidade Estadual de Londrina
Brazil

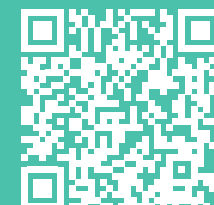

"ZerofloX sets itself apart from all existing micro applicators and will eventually represent a new standard for the category. During clinical use, my patients experience greater comfort when applying intraoral products. ZerofloX provides better surface wettability and superior durability, allowing repeat use in more than one tooth or restoration, eliminating the need to use more than one micro applicator per patient. This drastically reduces the number of disposable applicators in the clinical routine."

Prof. Paulo Vinicius Soares, DDS, MS, PhD
Brazil

Say *hello* to
ZerofloX™

The new standard
flock-free micro applicator.

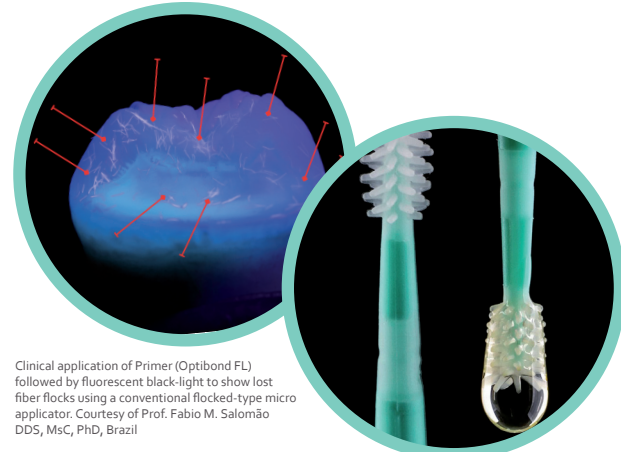

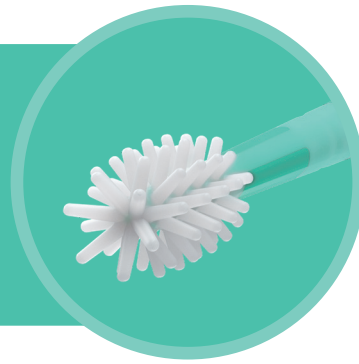

TRY IT.
Apply it.
LOVE IT.

FLOCK FREE

Is what you see,
really what you get?

Clinical application of Primer (Optibond FL) followed by fluorescent black-light to show lost fiber flocks using a conventional flocked-type micro applicator. Courtesy of Prof. Fabio M. Salomão DDS, MSc, PhD, Brazil

Flock Loss cannot always be seen, but it's there.

- ZerofloX micro applicator is FLOCK-FREE. Its fiber-free elastomer bristles ensure the final restoration remains uncontaminated.
- ZerofloX reliably holds the adhesive and stays intact during brushing test.
- Unlike conventional fiber flocked dental applicators ZerofloX provides uniform application due to its flock-free elastomer bristles.

SAVE MATERIAL

Curious about the secret to
saving material and achieving
almost perfect applications?

ZerofloX minimizes
material waste
by up to 60%**

- ZerofloX micro applicator maximizes adhesive material efficiency to ensure the highest amount of primer and bond is delivered into the cavity with minimal waste.
- It holds just the right amount of material on its tip.**
- Specially designed elastomer brush head ensures superior liquid carrying potential.
- The results do not simply look good – they look genuinely just about perfect.

EASY ACCESS

Having trouble accessing
difficult to reach clinical sites?

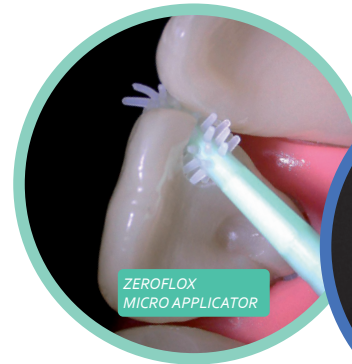

Images courtesy of M.Sc., Luis Fernando Bessel, Brazil

- Accurate application is retained even when the ZerofloX micro applicator is flexed in different directions.
- Ensures precision with its elastomer bristles designed for superior liquid retention.
- Flexible head with dual bending points and soft elastomer material allow dentists to access difficult to reach areas.

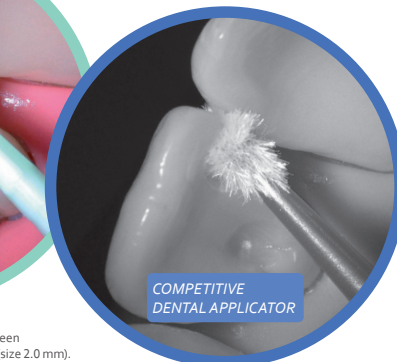

ONE-SIZE-FITS-ALL*

Looking for a universal
dental applicator?

ZEROFLOX MICRO APPLICATOR

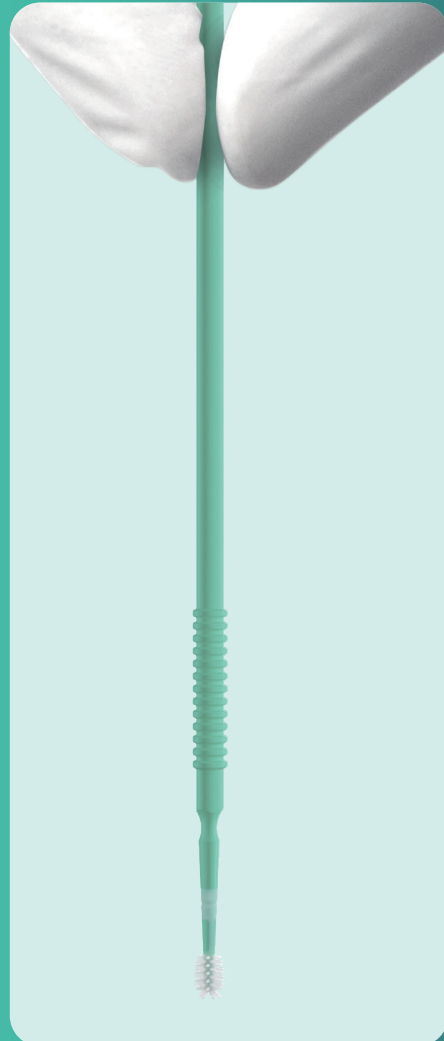

COMPETITIVE DENTAL APPLICATOR

These images showcase the comparison between ZerofloX and competitive dental applicator (size 2.0 mm). The competitive dental applicator (size 2.0 mm) is only able to apply material in front of the cavity, failing to reach the desired area. In contrast, ZerofloX fits perfectly inside the interproximal cavity, effectively reaching the desired area. Image courtesy of medmix switzerland AG

UNIVERSAL HEAD SIZE

- With a soft, pliable and thin anterior head design
- Effectively combines the fine and regular diameter sizes from conventional flocked micro applicators into ONE SIZE to help simplify clinical procedures and reduce inventory
- Allows easy intraoral access for a wide range of clinical applications and indications for use

Various range
of applications

 **Swiss Quality**
at the Highest Level

* Universal head size with a soft, pliable and thin anterior head design effectively combines the fine and regular diameter sizes used for conventional micro applicators into one size to help simplify clinical procedures and reduce inventory.
