

Be safe with the original QUADRO™ Mixing Tips

Illegal copies can be dangerous AND costly. Knock-off products are usually inferior, and misapplications can be dangerous to humans and animals. At a minimum, using unverified copies can lead to double work correcting misapplications, doubling the cost. Using original systems for dispensing 2-component materials from certified manufacturers ensures greater economy and dispensing safety for people and the environment. medmix's strict quality controls, detailed know-how, and supporting consulting service are important for professionals.

Today, medmix mixing systems cover the entire industry of 2-component adhesives and sealants. Years of development and cooperation with material manufacturers and their customers in the industrial and DIY sectors allows medmix systems to boast top of class reliability at optimum prices. Copies can never achieve medmix's high level of reliability because they are not developed to be compatible with an entire system. Every misapplication due to cheap copies can lead to high repair and correction costs. Cheap also means no guarantees – all misapplication costs are borne by the customer.

Cheap copies can lead to cheap seals and bonds – these are accidents waiting to happen. medmix focuses on maximum safety for people, animals, and the environment.

medmix invests millions in the development of its products to ensure safe and economic use. Long-time investments in mixer system technology allow for economically viable 2-component adhesive/sealant systems. From the dispenser to the mixer, genuine medmix products provide a best-in-class total system for application of 2-component adhesives and sealants.

Buying cheap copies risks damage to users and the reputation of the entire industry. Accordingly, medmix invests heavily to protect and educate the market to successfully detect and deny risky, cheap copies.

Recently, medmix prosecuted distributors of a large shipment of illegal copies of the well-known Quadro™ brand mixers. These dangerous copies of agricultural sector mixers, used in hoof care, can cause great damage. Every misapplication results in unrecoverable money lost to the farmer.

Customers and users can trust that medmix Switzerland AG will continue to defend their rights, their health, and their economic safety.

Figure 1: Original Quadro™ mixer from medmix used for hoof repair.

Figure 2: Original Quadro™ mixers are recognizable by their square shape, typical colors and logo.

Figure 3: The typical colors of the original Quadro™ mixers are green, white, orange and grey.

Figure 4: Most Quadro™ mixers feature the logo on their housing.

About medmix

medmix is a global leader in high-precision delivery devices. We occupy leading positions in the healthcare, consumer, and industrial end-markets. Our customers benefit from a dedication to innovation and technological advancement that has resulted in over 900 active patents. Our 14 production sites worldwide together with our highly motivated and experienced team of around 2'100 employees provide our customers with uncompromising quality, proximity, and agility. medmix is headquartered in Baar, Switzerland. Our shares are traded on the SIX Swiss Exchange (SIX: MEDX). www.medmix.swiss
