**MIXPAC™ greenLine™ two-component cartridge systems win 2024 BIG Sustainability Award**

medmix Switzerland AG has been named a winner in the 2024 BIG Sustainability Awards presented by the Business Intelligence Group. This achievement complements the company's BIG Innovation Award in January 2024 for its MIXPAC™ greenLine™ 400 mL 1:1 two-component cartridge set.

The MIXPAC greenLine two-component cartridge systems are more sustainable products made of post-consumer recycled (PCR) or post-industrial recycled (PIR) materials, significantly reducing CO<sub>2</sub> emissions by up to 66% without compromising on quality. These recycled plastic-based cartridge systems include all the advanced design features and benefits of their proven versions made from conventional plastics, ensuring safety and minimizing cross-contamination risks. The greenLine versions maintain the same high-performance standards of the conventional MIXPAC cartridges and are designed for seamless integration into existing compatible dispensers offering an eco-conscious solution without the need for process changes, thus bridging the gap between environmental responsibility and industrial efficiency.

*"Forget greenwashing – at medmix, they have put sustainability at the heart of everything they do," declared Russ Fordyce, Chief Executive Officer at Business Intelligence Group. "We're inspired by their dedication and excited to showcase the incredible work they're accomplishing."*

Organizations from across the globe submitted their recent innovations for consideration in the BIG Innovation Awards. Nominations were then judged by a select group of business leaders and executives who volunteer their time and expertise to score submissions.
