Innovation in Application

# MIXPAC™ Overview

## One- and multicomponent systems

This overview is an excerpt of possible MIXPAC™ systems for one- and multicomponent materials and their applications. We develop needs-oriented system solutions for specific materials directly with our customers in step with actual practice.

We collaborate closely with you to find the ideal solution for the various types of materials. With our expertise, we are providing products with optimal mixing and dispensing performance to ensure safety for the patient.

is aimed at  
putting a smile  
on the faces of  
our customers.

# With your success in mind

We can increase your success in the dental market with groundbreaking innovations and customized system solutions related to mixing, dispensing and application of dental materials.

All of the Mixpac™ Candy Colors™ are available upon request for mixing tips in any diameter, length, type or application. The Candy Colors™ stand for our Swiss Quality.

We are an interdisciplinary team with the highest level of professional expertise, focused on driving your success in the worldwide dental market. We work hand in hand with our customers as an innovative solution partner for dental application systems. This catalog highlights innovative application solutions for dental materials and their use in prosthetics, prevention, tooth preservation, esthetics and endodontics.

As a Swiss manufacturer with superior quality standards, the Sulzer Mixpac AG has been a leader in technology for decades and is integrated into the Sulzer Group. Besides investing millions every year into research and development, we are extremely familiar with the wishes and needs of material manufacturers and end customers. We test new materials in our laboratories as well as develop customized system solutions for ideal packaging and perfect applications together with renowned international dental brands.

Our strategy is simple. MIXPAC™ is always intenting to make the work of the user easier and to make packaging, mixing, dispensing and application simpler, safer and more efficient. This focus on the benefit for the end user is of advantage to our customers. We promote your success in the dental market through innovations in application.

This catalog lists all standardized MIXPAC™ dental products. It gives you an overview of MIXPAC™ system solutions for one-component and multicomponent materials. We would be pleased to answer your questions on our portfolio in person.

**The Sulzer Mixpac team increases your success with customers.**

# MIXPAC™ The Original

## Partner with Swiss Quality

The Swiss original stands for innovation in application - for System solutions which lead in precision, safety and compatibility to provide maximum efficiency. Six different colors distinguish the look: yellow, teal, blue, pink, brown and purple. All of the Mixpac™ Candy Colors™ are available upon request for mixing tips in any diameter, length, type or application. The Candy Colors™ stand for our Swiss Quality.

# 2.5 to 10ml Systems

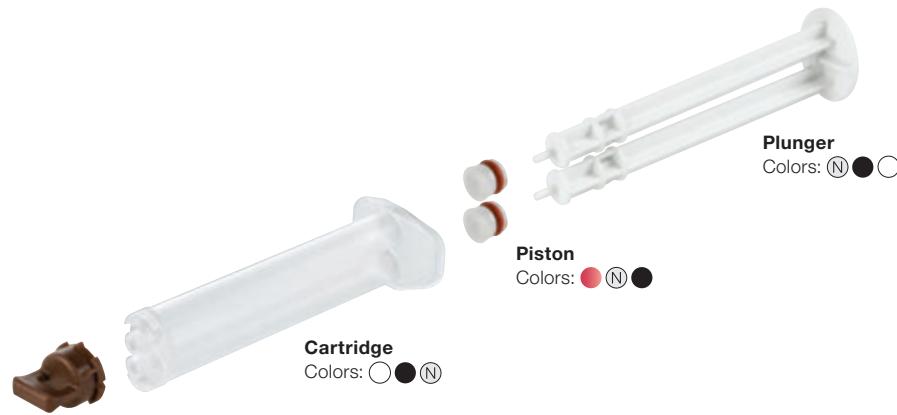

For smaller volumes. Comprehensive MIXPAC™ application system for intraoral and extraoral applications. Product diversity and unique quality of the various components increase the scope for the most varied material compositions. All of the Mixpac™ Candy Colors™ are available upon request for mixing tips in any diameter, length, type or application. The Candy Colors™ stand for our Swiss Quality.

# MIXPAC™ T-Mixer™

## It is so easy to save material

The patented Mixpac T-Mixer mixing tips reduce the volume of material waste by up to 40 percent compared to helical mixing tips. The shortened T-Mixer generation also guarantees high quality mixing results and precision application.

The latest mixing geometry revolutionizes the principle of static mixing. The individual molecules are distributed more homogeneously to achieve perfect reactivity of the material. The shorter mixing tips meet daily requirements in precise clinical application.

The MIXPAC™ T-Mixer mixing tip was rated «excellent» by the Dental Advisor:

- 67 % of consultants found the mixer to be better than conventional 2-K dental mixers
- 83 % would change immediately to the new MIXPAC T-Mixer™
- 87 % would recommend the new MIXPAC T-Mixer™ to a colleague

**The shape and colors of the MIXPAC™ T-Mixer mixing tips as well as the orange mixing element are trademarks of Sulzer Mixpac.**

All of the Mixpac™ Candy Colors™ are available upon request for mixing tips in any diameter, length, type or application. The Candy Colors™ stand for our Swiss Quality.

# MIXPAC™ Colibri™

## Makes it easier to be flexible

**360° rotatable and  
bendable**

MIXPAC™ Colibri greatly facilitates precise and individual application. The bendable and fully rotating metal cannula allows convenient treatment without constraints. The high level of user convenience and safety in treatment increase working efficiency.

All of the Mixpac™ Candy Colors™ are available upon request for mixing tips in any diameter, length, type or application. You can choose any size and any of our Candy Color™ in combination to represent your product brand and partner with Swiss precision.

The Colibri mixing tips are designed like the conventional MIXPAC™ mixing tips. The distinguishing feature, however, is the integrated metal cannula made of medical stainless steel. Therefore there is no need to attach any application tip. It can be shaped by hand into any desired form and fully rotated.

Bending the cannula does not alter the inner diameter. The ends of the metal cannulas are rounded and thus minimize the risk of injury. MIXPAC™ Colibri facilitates the precision work of dentists in numerous difficult standard situations and increases safety.

**MIXPAC™ Colibri™ is available in outer diameters of 0.9mm, 1.1mm and 1.4mm.**

# MIXPAC™ system solutions

## Customized to meet highest demands

We develop individual system solutions for perfect dispensing of the most diverse materials for our customers. Whereby all components are meticulously matched. Using MIXPAC™ original products ensures safety and a time-saving workflow. You can choose any size and any of our Candy Color™ in combination to represent your product brand and partner with Swiss precision.

### Application tips

For the easy and precise dispensing of different materials in difficult clinical situations.

### Mixing tips

Sulzer Mixpac delivers the optimal mixing tip for every application. The innovative mixing technology opens new options in materials development. Homogeneous mixing results are achieved at low loss of material.

### Cartridges

A broad range of cartridges with various volumes and mixing ratios is available for multicomponent applications. Including system solutions for one-component products.

### Dispenser

The ergonomic design of the dispensers allows simple and precise dosing from low to highly viscous materials.

# MIXPAC™ Dental Products

## Swiss quality for the highest demands

We leave nothing to chance in the quality of our dental products. We place great emphasis on efficient technology, intelligent automation and coordinated process capability. The entire manufacturing process is accompanied by comprehensive quality assurance.

The individual components of the MIXPAC™ application solutions are matched and compatible and have proven themselves for decades on the dental market. Cleanroom production for the highest standards in hygiene, tested products for best mixing results and reliable technical support offer users maximum benefits.

**Sulzer Mixpac meets the highest medical quality standards (ISO 13485/ISO 14644) for manufacturing perfect hygienic dental products.**

# 380 ml System

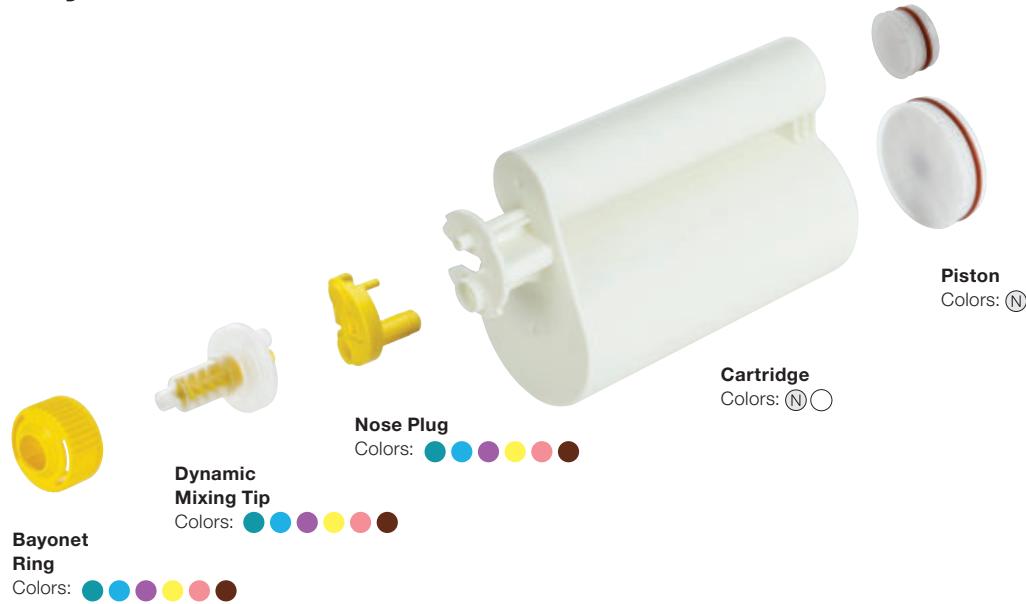

For large volumes. First class MIXPAC™ system solution for the dynamic mixing of impression taking materials at a ratio of 5:1. Excellent, thorough and easy handling, high functionality and comprehensive system compatibility.

# 0.75 - 50 ml Systems

For application of one-component dental materials. The perfectly matched systems with Luer-lock provides maximum flexibility in application. At the same time the ergonomic design promotes easy and safe handling.

MIXPAC™

# 0.75 ml Syringe

Luer Lock | 3-part

**0.75 ml Syringe**

Colors: ● ○ ▶

► Caps &  
Accessories page 57  
► Tips page 76

Item	Description	Grip Plate	Cylinder Material	Plunger Material	Grommet Material	Packing Unit	Order No.	Article No.
<b>Syringe</b>	0.75ml black (lightsafe)	standard	PP	PP	Isoprene, black	6'000	162 318	FU0007501
	0.75ml white/transparent	standard	PP	ABS/PP	TPE	6'000	165 104	FU0007502

**Features**

- Luer Lock thread
- Highly polished surface
- Smooth gliding
- Low compression set
- Grip plate assures safe handling
- Compact design for efficient retail – packaging
- Plunger with pin
- No o-ring
- Siliconized, latex-free
- Light-safe (black)
- Bulk, non-sterile

**Benefits**

- 0.75 ml and 1 ml syringe cylinders have the same outer diameter which enables the usage of the same filling machinery

**Usage for**

- Low-viscous materials
- Introduction campaigns
- Rare shades

**Services**

- Cylinder printing
- Individualization (Colors, Grip Plate)

# Contract Filling

## Application Systems

Over 15 years of experience have made us an excellent partner for contract filling. High precision filling services are available on fully automated production lines for dental liquids and composites.

Bulk Material Types:

**LIQUID**

**PASTE | GEL**

**COMPOSITE  
FLOWABLE**

### Delivery System

Selection of the delivery system for your dental bulk material:

- Bond Container (liquids, adhesives)
- Needle Capsules (low viscous composites)
- Composite Capsules (high viscous composites)

Definition of the **product parameters**:

- Filling volume
- Unit dose color
- Printing layout

### Kit Packaging

As added service, we offer the realisation of an ideal secondary packaging. We source all necessary outer packaging, like chip-boxes, directions for use & tech cards on basis of your artwork and assemble your "ready to sell" kits.

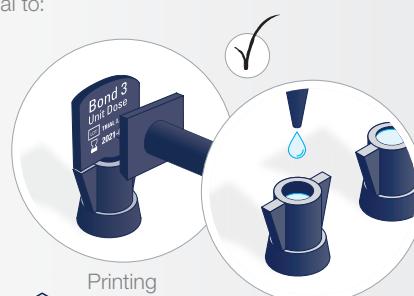

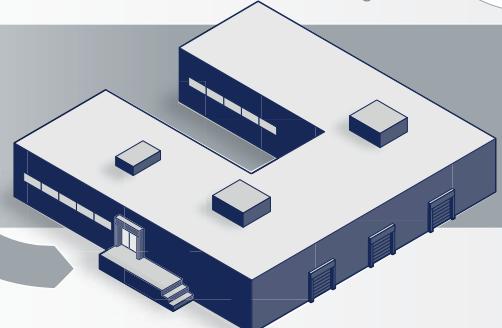

### Filling

After the approval of the trial samples and approval of the product specification, we will start the serial filling with an established qualification and validation process, guaranteeing you consistent quality for each batch.

### Trial Run

We test the filling equipment with your bulk material to:

- find optimal filling process parameters
  - define tolerances
  - and provide prototypes
- for your stability and market tests.

Finished Goods

Optional Kit Packing

# Contract Filling

Precise dosing, short lead times and flexible production capacities for the entire product life cycle enable our customers to shorten the time-to-market and focus on clinical & chemical research and development. Our experienced team works closely with your product management, supporting you to choose the right unit doses and create unique and perfect solutions for your dental products.

# Bond 3 Unit Dose

## Bonding/Liquid unit dose

BOND 3 Unit Doses can be filled up to 0.25ml and are sealed with high quality printing. Also they can be packaged in ready-to-sell kits – including: Box, DFU, applicators, MSDS, tech cards.

**Features:**

- Max filling quantity: 0.25 ml
- Colors: black, orange, red, grey
- Custom colors: - available -
- Customized Printing: logo, variable data (LOT/EXP)

**Benefits:**

- Light-safe
- Migration resistant against all common polar solvents & monomers
- No pouch needed
- Proven & attractive design
- Easy handling ("break, dip, apply")
- Integrated pedestal
- Individual colors support the brand

MIXPAC™

# Needle Capsules

## Flow & Bulk Fill Capsule

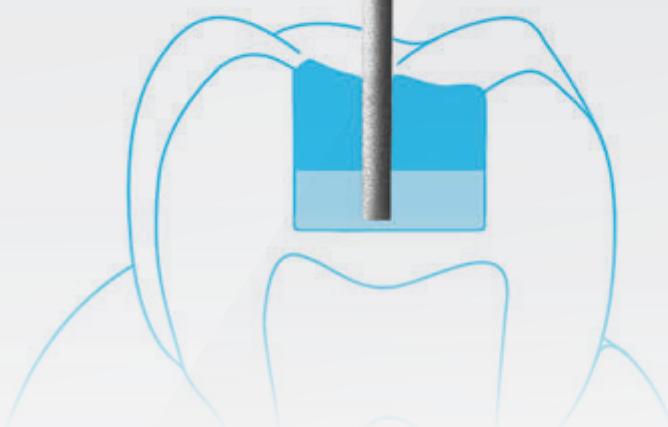

Needle Capsules with 20 G needle tubes are precise application tools for bulk fill composites and can be used with common composite guns.

### Features:

- Standard colors: black, grey
- Custom colors: - available -
- Cap colors: various
- Printing: logo, product name, LOT/EXP, shade code

### Benefits:

- Light-safe, Break-proof, Optimized plug
- Excellent access undercuts and small cavities
- Stainless steel tube
- For usage with „composite guns“
- Usage with low viscosity materials: flowable composite, bulk fill
- Easy removable cap for added convenience
- Custom colors support brand designs
- Annealed steel tubes (optional)

# Sulzer Mixpac

## Your solution partner for innovation

Sulzer Mixpac works hand in hand with the worldwide leading manufacturers of dental materials to develop new application forms and customized solutions. 360° Cooperation is the name of our service strategy, which is aimed at providing decisive selling advantages.

Sulzer Mixpac is a partner for research, innovation, development, manufacturing, service and logistics. The company drives the success of the OEM with simple and intelligent application systems. At the same time we facilitate and optimize the work of the users. In many cases, Sulzer Mixpac has been working for the same dental brands for decades. And in the process, we take on far-reaching responsibility up to a smooth product launch.

Sulzer Mixpac monitors events on the dental market very closely. We analyze the trends and know and understand the needs of manufacturers and end users. We continuously investigate new materials in-house and optimize and develop application forms, which we subject to extensive testing before getting them ready-to-market. Sulzer Mixpac is a technology leader and is regarded as a strong partner with a Swiss attitude to quality.

Let us join  
together in the  
search for new,  
intelligent solutions  
mixing, dispensing  
and application of  
dental materials.
