MEDIA RELEASE

January 22, 2024

medmix wins 2024 BIG Innovation Award for MIXPAC™ greenLine™ 400 mL 1:1 two-component cartridge set made from up to 100% recycled plastic

medmix' MIXPAC greenLine 400 mL 1:1 two-component cartridge, launched in May 2023, has been selected as a winner in the construction category at the 2024 BIG Innovation Awards presented by the Business Intelligence Group (BIG). The cartridge set is an innovative product made from up to 100% post-consumer recycled (PCR) plastics, significantly reducing its CO₂ footprint by up to 38% without compromising quality.

Designed for seamless integration into existing dispensers compatible with MIXPAC 400mL 1:1 cartridges, medmix' novel solution offers a reduced carbon footprint and supports the circular economy without requiring any process changes. This sustainable innovation aims to bridge the gap between environmental responsibility and industrial efficiency while maintaining the same high-performance standards as the conventional MIXPAC cartridges.

medmix is set to participate in the upcoming [World of Concrete](#) event in Las Vegas, January 23-25. This key industry event offers an exceptional platform to highlight the distinct features and benefits of medmix' newest development, reflecting the company's focus on innovation and sustainability. In addition to the MIXPAC greenLine systems, medmix will be showcasing MIXPAC ecopaCC™, a CO₂-reducing two-component system as well as the new rackless cordless dispenser COX™ speedflex™ marking its first-time presentation.

-Ends-
